WhatsApp Messenger: 03409026072 | **Address:** Mardan, Pakistan (Home)

ABOUT ME

As a Computer System Engineer and MERN stack developer, I excel in system architecture, backend, and frontend development. With expertise in MongoDB, Express.js, React.js, and Node.js, I build robust web applications and ensure seamless integration across teams. I thrive in dynamic environments, continually enhancing my skills and staying updated with industry trends.

WORK EXPERIENCE

06/11/2023 – CURRENT Peshawar, Pakistan

FRONTEND WEB DEVELOPER K2X

- Collaborated closely with designers to convert design concepts into pixel-perfect UI/UX implementations, ensuring a visually appealing and user-friendly frontend for web applications.
- Integrated APIs seamlessly into the frontend, working closely with backend developers to establish efficient communication between frontend and backend systems.
- Implemented authentication mechanisms in the application, enhancing security and user access control through robust authentication processes.
- Utilized Chart.js library to create dynamic and interactive charts in React.js, providing data visualization functionalities for enhanced user experience.
- Developed APIs in Node.js to support chart data retrieval and processing, facilitating real-time data updates and interactions within the application.
- Managed data storage and retrieval processes by uploading data to MongoDB, ensuring data integrity and scalability for efficient data management and analysis.

02/10/2023 – 01/01/2024 United Nation, United States

JUNIOR MERN STACK DEVELOPER REVELTEK INC

- Develop user interfaces using React.js, ensuring a responsive and visually appealing design <https://gopriv.com/facials>
- Collaborate with UI/UX designers to translate design specifications into functional interfaces
- Conduct Manual testing and debugging to maintain code quality and contribute to continuous improvement.
- Build server-side logic with Node.js and Express.js, handling HTTP requests effectively.
- Design and maintain RESTful APIs for seamless communication between the frontend and backend

05/08/2023 – 01/10/2023 Abbottabad

FRONTEND WEB DEVELOPER PIXEL IO TECHNOLOGY

- Collaborate with the design team to convert wireframes and design mockups into interactive and visually appealing user interfaces.
- Write clean, efficient, and maintainable HTML, CSS, and JavaScript code using React Framework for implementing frontend functionalities.
- Ensure the website or web application is responsive and works seamlessly across various devices and screen sizes.
- Optimize frontend performance to improve page load times and overall user experience.
- Assist in integrating frontend components with backend APIs and data sources.
- Conduct browser and device compatibility testing to ensure consistent rendering across different environments.
- Participate in code reviews and provide constructive feedback to improve code quality.
- Stay up-to-date with the latest frontend development trends and technologies.
- Troubleshoot and debug frontend issues to enhance the application's performance and functionality.

- Developed and maintained responsive web applications using HTML, CSS, Bootstrap, JavaScript, and jQuery
- Implemented interactive user interfaces and enhanced user experiences
- Collaborated with cross-functional teams to ensure seamless integration of front-end and back-end components
- Utilized the MERN stack (MongoDB, Express.js, React.js, and Node.js) to build scalable and efficient applications
- Integrated third-party APIs and services to enhance functionality

PERSONAL PROJECT

- **Movies website:**
 - A streaming service for movies and shows, similar to Netflix, with features such as user profiles, playlists, recommendations, and a library of curated content from various genres and languages.
 - The technical stack I employed in this project was HTML/CSS/JSX, Bootstrap and ReactJS.
 - https://github.com/romankhanromii/Movie_app_in_react
- **Admin Dashboard:**
 - During this project, I designed and developed an admin table web application using React, a popular JavaScript library for building user interfaces.
 - The goal of the project was to create an efficient and user-friendly interface to manage and display data in a tabular format, catering to administrative needs.
 - <https://github.com/romankhanromii/Admin-table>
- **Country Finder:**
 - This is country finder app and integrate the api of country which find the country by name and also find the detail of country.
 - <https://github.com/romankhanromii/country-finder>

● EDUCATION AND TRAINING

20/09/2019 – 21/06/2023

COMPUTER SYSTEM ENGINEERING University Of Engineering and Technology

- Computer Fundamentals
- Computer Programming
- Object Oriented Programming
- Data Structure and Algorithms
- Operating Systems
- Web Engineering
- Database Management Systems

Address Peshawar, Pakistan | **Website** <https://www.uetpeshawar.edu.pk>

● DIGITAL SKILLS

FRONTEND

HTML / CSS / BOOTSTRAP / TAILWIND CSS / JAVASCRIPT / ES6 / JQUERY / REACT JS / REDUX, REDUX TOOLKIT | NEXT JS / REACT QUERY / REACT HOOK FORM

BACK END

Javascript(Nodejs, ExpressJs)

DATABASES

SQL / MONGO DB

VERSION CONTROL

GIT / GITHUB / GITHUB (commit, push, pull, .sync and pull request) / BRANCHING AND MERGING | Atlassian (Bitbucket, Confluence, Jira) | Platform : AWS Cloud

PROJECT MANAGEMENT TOOL

Atlassian (JIRA/CONFLUENCE)

● **COMMUNICATION AND INTERPERSONAL SKILLS**

Good Communication and Presentation skills

Good Time Management skills

Problem-solving skill

Good Technical Writing skills
